

Business Model Canvas

Designed for: **DiagramOS**

Designed by: **Strategy Team**

Date: **March 2026**

Key Partners

Cloud & Infra

- ▶ AWS / GCP (diagram rendering, LLM inference)
- ▶ Vercel / Railway (serverless deploy pipeline)

AI & ML Layer

- ▶ Anthropic Claude API (NL-to-code reasoning)
- ▶ OpenCV / Roboflow (diagram element detection)

Ecosystem

- ▶ GitHub / GitLab (code export & CI/CD)
- ▶ Figma & Miro (plugin marketplace entry points)
- ▶ University labs for research partnerships

Key Activities

Core Engineering

- ▶ Diagram-to-IR (Intermediate Representation) engine
- ▶ Multi-modal AI pipeline: image → AST → runnable code
- ▶ Self-healing code generation with live preview sandbox

Product

- ▶ Whiteboard + diagramming canvas (in-app)
- ▶ Template library: ERDs, flowcharts, wireframes
- ▶ One-click deploy to any cloud target

Growth

- ▶ Developer community & open-source diagram parser
- ▶ Plugin ecosystem for Figma, Miro, Lucidchart

Value Propositions

Core Insight

- ▶ Draw a diagram → get a working app. No boilerplate.

For Builders

- ▶ 10× faster MVP: sketch ERD, get full-stack CRUD app
- ▶ AI explains every code decision — learn while you build
- ▶ "Diagram-first" = living documentation baked in

For Enterprises

- ▶ Turn legacy architecture diagrams into modernised microservices
- ▶ Auto-generate IaC (Terraform/Pulumi) from infra diagrams
- ▶ SOC-2 compliant private deployment mode

Unique Moat

- ▶ Proprietary Diagram IR format becomes industry standard

Customer Relationships

Self-Serve

- ▶ Instant free trial — no credit card
- ▶ Interactive AI tutor inside the canvas
- ▶ Community forum + public diagram gallery

Managed

- ▶ Dedicated CSM for Enterprise accounts
- ▶ White-glove onboarding & migration sprints

Ecosystem

- ▶ Contributor program: share diagram templates, earn credits
- ▶ Certified partner program (agencies & consultancies)

Customer Segments

Primary

- ▶ Solo founders & indie hackers (0→1 builders)
- ▶ Early-stage startups (seed → Series A)

Secondary

- ▶ Mid-market SaaS engineering teams
- ▶ Enterprise digital transformation teams

Tertiary

- ▶ CS/SE educators & bootcamp instructors
- ▶ No-code power users hitting platform ceilings

Geo Focus

- ▶ US, EU, MENA, SEA — developer-dense markets

Key Resources

Intellectual

- ▶ Diagram-to-IR parser (proprietary transformer model)
- ▶ Semantic code generation engine + prompt library
- ▶ Patent: multi-modal diagram interpretation pipeline

Human

- ▶ ML engineers specialising in computer vision + LLMs
- ▶ Developer advocates & OSS contributors

Physical / Digital

- ▶ GPU inference cluster (A100s) for real-time generation
- ▶ Multi-region diagram rendering CDN

Channels

Awareness

- ▶ Product Hunt launches, HackerNews Show HN posts
- ▶ YouTube "build an app by drawing" viral demos
- ▶ Dev influencer & tech Twitter / X sponsorships

Acquisition

- ▶ PLG: free tier inside Figma & Miro plugins (400M+ users)
- ▶ SEO: "no-code app builder", "diagram to app" keywords

Conversion & Retention

- ▶ In-app upgrade prompts at code-export milestone
- ▶ Monthly "Diagram Drop" newsletter with templates

Cost Structure

Fixed

- ▶ LLM API costs (Claude / GPT-4o vision) — largest COGS
- ▶ GPU cluster rental for diagram rendering (~\$40K/mo at scale)
- ▶ Core engineering team (10 FTEs) — salaries + equity

Variable

- ▶ Cloud egress & storage per generated project
- ▶ Contractor costs for OSS community bounties

One-time

- ▶ IP filing & patent prosecution (~\$120K initial)
- ▶ SOC-2 Type II audit & compliance tooling

Revenue Streams

SaaS Subscriptions

- ▶ Free: 3 diagrams/mo, watermarked export
- ▶ Pro (\$29/mo): unlimited diagrams, all languages, private repos
- ▶ Team (\$99/mo per 5 seats): collaboration, version history, CI/CD hooks
- ▶ Enterprise (\$2K–\$20K/mo): private cloud, SSO, SLA, custom model fine-tuning

Usage-Based Add-ons

- ▶ Pay-per-render: \$0.05 per diagram generation beyond quota
- ▶ Premium AI models: \$0.10/generation for GPT-4o Vision pass-through

Marketplace & Services

- ▶ Template marketplace: 30% revenue share with creators
- ▶ Professional services: \$250/hr for enterprise migration sprints
